

Room Disinfection Unit

Effective protection against germs at the push of a button – quick, easy and certifiable

Quality for life

- 1 Test strips (Art. no. 640Z41) – for misting verification and testing of disinfection results
- 2 Room disinfectant (Art. no. 640Z40) – environmentally friendly and residue-free biocide
- 3 Room disinfection unit (Art. no. 758E1)

Your new standard of hygiene: equal to that of a doctor's office

With the automatic room disinfection unit, you can eliminate pathogens in your store and provide a healthier environment for your customers and your team.

Despite thorough scrubbing and wiping disinfection, 42% of surfaces in medical areas have very high levels of microbial contamination.*

This health risk, which affects you, your employees and customers, can be efficiently eliminated with the touch of a button: the mobile room disinfection unit produces a fine disinfectant mist which reaches normally inaccessible areas. Disinfection is carried out automatically according to the settings you have defined – quickly, efficiently and safely – without leaving any toxic residues behind.

Features and Benefits

Room disinfection unit

Art. no. 758E1:

- System mobility enables user-friendly disinfection – wherever it's needed
- Broad-spectrum hydrogen peroxide disinfectant is effective against bacteria, fungi, spores and viruses – including noroviruses
- Disinfectant mist allows even inaccessible areas to be cleaned
- Silver ions prevent the growth of new bacteria and offer long-term protection
- Environmentally friendly and residue-free biocide
- Highly efficient while offering the highest levels of hygiene and lowest possible personnel expenditure

Technical data for the disinfection generator

Basic data	
Max. volume of space that can be disinfected	270 m ³
Average disinfecting liquid used	2 ml/m ³
Storage container volume	5 l
Dry air compressor, without oil	1.6 m ³ /h
Noise level	62 dB
Electrical connection	
Frequency	50/60 Hz
Consumption	350 W
Voltage	230 V
Weight	20 kg
Dimensions	
Height	800 mm
Width	390 mm
Depth	300 mm

Additional information regarding disinfectant Technical data

Broad-spectrum hydrogen peroxide disinfectant with silver complex	
Container volume	5 l
Physical state	Liquid
Smell	Characteristic
pH value at 20°C	2 – 5
Colour	Clear
Durability	2 years
Range of efficacy	Bacteria, fungi, spores, viruses incl. noroviruses
Biodegradable	99.99%
